Dear Chris,

Re: La Sila - Stanley House Road

It is with great appreciation that we write this letter to you, John and all the crew of Tamarack North. The building of La Sila involved three stages: the demolition of our old cottage, the construction of our new cottage including a garage and the landscaping of the property.

Our goal in working with Tamarack North was that we would be "delighted" with the process and quality of the construction of our new cottage. Overall we have been delighted with the professionalism of your entire crew and the consistent quality produced in the building of La Sila.

One of the strongest attributes that we were able to establish with Tamarack was trust. We believe it was this trust we established very early in the process that helped us work towards a successful outcome. Another factor that help "delight" us was Tamarack's ability to understand our vision for our cottage.

Your work has helped us set a solid foundation for many great years of enjoyment at La Sila.

Thank you,

Lora and Brian Gernon
